

How to collect your cat's urine:

1. Empty the contents of your cat's litter box.
2. Thoroughly wash the litter box and make sure it is completely dry.
3. Put the contents of the provided plastic bag containing sand into the litter box.
4. Use the provided pipette to collect the urine as soon as it is produced and place it in a sterile container.
5. Bring us the urine within the following time frames:
 - Less than 2 hours at room temperature
 - Less than 10 hours if refrigerated

The first urine of the morning is preferable.
